Abstract

Placeholder abstract (Neural Networks Guide for Authors: $\leq$ 250 words). Scientific abstract will be migrated from the Factorized FALI source without claim rewriting in this shell-establishment step.

Keywords: mechanistic interpretability, attention, causal attribution, transformers, FALI

1. Introduction

Shell compilation check cite (Placeholder and Example, 2026).

*Placeholder title from the Factorized FALI Springer draft. Scientific wording will be migrated in a later authorized step.

*Corresponding author
Email address: author.one@example.edu (Author One)

2. Related Work

3. Problem Formulation

4. Factorized Attention-Level Intervention

5. Method Validation

6. GPT-2 Indirect Object Identification

7. Ablation and Gauge Robustness

8. Pythia Induction Transfer

9. Discussion

10. Limitations

11. Conclusion
