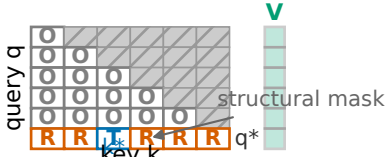
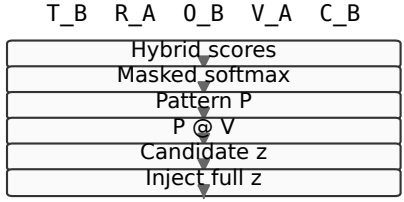
(a) **Score partition**



(b)



```
U(cell) = metric(hybrid candidate)
        − metric(candidate zero, same C)
```

(c)

32 hybrid cells

```
SCORE = {T, R, O}
VALUE = {V}
CONTEXT = {C}
```

```
Φ_SCORE = φ_T + φ_R + φ_O
Φ_SCORE + φ_V + φ_C = Δ_h
```

Standard Owen value; 36 admissible block-contiguous permutations.
Mixed cells are controlled counterfactuals.
